|                 |                                                                                                                                                                                                                                                                                                                                                               |
|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Mod de curatare | <p>Curatati cu o matura moale pentru a indeparta murdaria si praful. Se sterge cu mopul cu o solutie de apa calduta si un produs de curatare neutru (PH 6-8), apoi se clateste cu apa curata. Nu folositi solventi organici sau materiale abrazive.</p> <p>Pentru curatarea periodica, va recomandam <b>YPT – solutie de curatat materiale din vinil.</b></p> |
